Summary

I build AI systems that run in production and own their quality end to end. At FlowSpace I shipped AI agents that process unstructured inputs (PDFs, photos, web pages, spreadsheets) into structured records via LLM, with human review gates and automated push to the backend. I built evaluation loops to catch bad drafts before they reached reviewers, monitored output quality across hundreds of listings, and iterated on prompts and pipelines until reliability matched what the business needed. Eager to work in Go and deepen my backend systems skills. Based in the EU, available immediately, no sponsorship needed.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
