Summary

I build AI agents and GTM automations that replace manual workflows end to end. At FlowSpace I designed CRM lead-capture and outbound automations with n8n, integrated HubSpot-style CRM flows with vendor APIs via webhooks, and built AI support agents that answer queries against live platform data using RAG. I also shipped an n8n-orchestrated pipeline that takes unstructured inputs (PDFs, web pages, spreadsheets, photos), extracts data via LLM (Claude, OpenAI), structures it into standardized records, routes it through human review, and publishes it, serving thousands of users daily. I evaluate emerging AI platforms, make build-vs-buy decisions on automation tooling, and embed with teams to map processes, identify repetitive work, and ship the automation that removes it. Based in Italy with an EU long-term residence permit, available immediately.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
