Summary

I build automation pipelines and custom AI agents that replace manual work at scale. At FlowSpace I designed n8n and Make.com workflows that orchestrate APIs, webhooks, and LLM calls to automate marketing operations, CRM processes, provider onboarding, and content workflows. I built custom AI agents using Claude and OpenAI APIs with structured prompt engineering, function calling, and context management to automate content generation, data extraction, and classification tasks. One pipeline ingests unstructured data in any format (PDFs, websites, photos, spreadsheets), extracts structured records via LLM reasoning chains, routes through human review, and publishes to the platform, processing 900+ listings autonomously. I built web scrapers and data pipelines that feed clean data into Google Sheets, Supabase, and SQL databases. I integrated third-party APIs end to end (OfficeRnD, Nexudus, Stripe) with OAuth2, webhooks, retries, and monitoring. I trained team members on the automation tools I built. Based in Italy with an EU long-term residence permit, available immediately.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
