Summary

I deploy software at customer sites and own integrations from scoping through production. At FlowSpace I worked directly with engineering teams to integrate third-party platforms (OfficeRnD, Nexudus), ran technical onboarding for new clients, and built AI-powered tools used by thousands. I debug across frontend and backend codebases, communicate clearly with technical stakeholders, and turn customer feedback into product improvements. Based in the EU, willing to relocate to London, available immediately.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
