Summary

I build full-stack AI products with Next.js, Supabase, and LLM APIs. At FlowSpace I owned the full stack: a Next.js frontend, Laravel backend, PostgreSQL and MySQL databases, and Supabase for storage and auth. I built an AI pipeline that calls Claude and OpenAI APIs with structured outputs and function calling to process 900+ records, with evaluation, retry logic, and cost tracking. I integrated Stripe for payments on a freelance project (Urlink). I built workflow automations with n8n that run autonomously, and AI support agents that answer user queries against live platform data. I own the full integration lifecycle for third-party APIs (OAuth2, webhooks, error recovery) and use Claude Code as my primary development tool. Based in Italy, EU long-term residence permit, available immediately.

Experience

FlowSpace.co **Mar 2024 – Aug 2026**
Full-Stack & AI Engineer (Full-time, Freelance) *London, UK (remote)*

- Integrated OfficeRnD and Nexudus APIs end to end: connect flow, location sync, resource mapping, and automated bookings. Owned the full integration lifecycle from technical scoping to production.
- Ran technical onboarding for new workspace providers joining the platform. Configured their accounts, mapped their data, and resolved issues directly.
- Built an AI listing bot: takes a brochure in any format (PDF, web, photo, spreadsheet), drafts the listing via LLM, routes through human review, then pushes to the backend.
- Migrated the platform off a legacy stack to Next.js and Laravel. Mapped the data model, drove the cutover while the product stayed live. Scaled from 2,000 to 4,500+ users.
- Built CRM and GTM automations with n8n, plus AI support agents that answer queries against live platform data.
