Prabhavit Gupta

AI Engineer: Agentic Runtimes, RAG Grounding & LLM Evaluation

+39 351 610 7807 | prabhavitg@gmail.com | linkedin.com/in/prabhavit | github.com/prab-gupta | Venice, Italy

Summary

AI Engineer with 3 years of hands-on experience designing, shipping, and evaluating production AI agents, intelligent retrieval runtimes, and customer-facing LLM systems. Expert in grounding models against live enterprise databases and third-party APIs, optimizing RAG pipelines (chunking, semantic matching, structured parameter extraction), and conducting rigorous evaluation against production transcripts to eliminate hallucinations. Proven track record profiling latency, controlling API costs, and engineering automated testing and trace-analysis harnesses. Highly autonomous builder who works daily with Claude Code and modern AI development tooling to deliver reliable, production-ready software. Based in Venice, Italy with an EU Long Term Residence Permit (unrestricted EU work authorization without visa sponsorship). Immediately available.

Technical Expertise

- **Agent Architectures & Grounding:** Proactive conversational agents, Tool calling, Retrieval-Augmented Generation (RAG), Semantic vs exact-match search, Prompt engineering, Guardrails & fallback escalation.
- **Evaluation & Observability:** Production transcript evaluation, Trace analysis (Langfuse, debugging retrieval failures & tool errors), Schema validation, Automated end-to-end testing with Playwright.
- **Engineering & Stack:** TypeScript, JavaScript, Python, Node.js, Next.js, RESTful APIs, Webhook architectures, MCP (Model Context Protocol), n8n workflow orchestration, Git.
- **Data Stores & Infrastructure:** PostgreSQL, Supabase, Relational schema design, Vector search concepts, JSON payload parsing, Rate-limiting, Cache optimization & token budgeting.
- **AI-Native Development:** Daily default use of Claude Code and modern AI agent tooling for rapid implementation, profiling, and refactoring.
- **Languages & Work Authorization:** Hindi (Native), English (C1 Professional), Italian (Beginner). EU Long Term Residence Permit (Permanent unrestricted work authorization in Italy and EU without visa sponsorship).

Experience

FlowSpace.co **Mar 2024 - Aug 2026**
Lead Developer (Full-time, Freelance) *London, UK (remote)*

- Built and operated the production AI customer support agent on a coworking platform serving 4,500+ active users, handling live inquiries on pricing, availability, and bookings.
- Grounded agent responses against live operational databases and partner APIs (OfficeRnD, Nexudus), engineering strict tool-call schemas and fallback logic that escalated to humans on low confidence.
- Evaluated model performance and failure modes against real production transcripts rather than synthetic benchmarks, systematically eliminating hallucinations in inventory and pricing answers.
- Profiled latency and API token consumption across model versions, optimizing prompt templates and context window usage to reduce operational cost while maintaining rapid response times.
- Deployed automated end-to-end test suites using Playwright, verifying API contracts and continuous integration stability across customer booking journeys.
- Spearheaded platform migration from a legacy stack to a modern Next.js and Laravel architecture, scaling capacity from 2,000 to 4,500+ users.
- Built automated data ingestion pipelines that parsed and validated unstructured partner listings, scaling platform inventory to 900+ active locations.

Urlink **Apr 2025 - Jul 2025**
Project Manager & AI Assisted Developer (Freelance) *Barcelona, Spain (remote)*

- Architected web application backend workflows, defining clear API contracts, relational schemas, and data transformation logic.
- Implemented automated validation pipelines connecting third-party services with PostgreSQL, preventing malformed inputs and ensuring data consistency.
- Integrated CI/CD workflows and automated regression checks to accelerate feature delivery.

Independent Technical Consultant **Aug 2023 - Feb 2024**
AI Solutions & Automation Engineer *Venice, Italy*

- Designed bespoke AI workflows, automated web extraction engines, and API integrations for European SME clients using Python, TypeScript, and Playwright.
- Translated manual, repetitive business operations into automated software solutions with structured logging and error recovery.
- Engineered webhook listeners and real-time synchronization pipelines across CRM and operational tools.

Education

Ca' Foscari University of Venice **2020 - 2024**
BA in Philosophy, International Studies and Economics *Venice, Italy*

- Rigorous foundation in formal logic, analytical problem solving, systems analysis, and macroeconomic decision models.
